

REFERRING PRACTITIONER  DNA Sample report	PATIENT  DOB: Test #: Date: Lab #:
---	---

MOLECULAR BIOLOGY

Specimen: Whole Blood

Method: Real-Time PCR, Nested PCR

Mycoplasma species	Nested PCR	-	Negative
Mycoplasma fermentans (separate run)	Nested PCR	+	Positive
Chlamydia species	Nested PCR	+/-	Equivocal
Borrelia species	Real-Time PCR	-	Negative

A negative test result does not exclude the possibility of a low level presence of Borrelia.

RESULTS

Disclaimer: The following disclaimers should be made:

- a) Due to the complexity of the method, any single assay may be only 80-90% accurate: for higher accuracy, the patient should have their blood analysed multiple times;
- b) Diagnosis should not be based on laboratory tests alone. Results should be interpreted in conjunction with clinical symptoms and patient history.
- c) General patient data is available on request, but detailed methods remain confidential for commercial reasons.
